

What is Palliative Care?

Palliative care focuses on relieving the pain and symptoms of advanced disease, chronic illness, or end of life. The goal of Palliative Care is to make you or your loved one as comfortable as possible, both physically and emotionally.

What sort of symptoms does a Palliative Care approach seek to relieve?

Pain, shortness of breath, nausea, constipation, fear, loss of appetite, confusion, fatigue, anxiety, depression, difficulty sleeping....

How will I know when the time is right for the Solace Program?

The Solace Program is appropriate anytime you or your loved one experiences an increase in symptoms due to chronic illness or the approach of end of life. Our care plan team may recommend it or you may ask for it at any time.

Our Solace Team

The Solace Team at Briody Health Care Facility consists of our Medical Director, Dr. Charles Yates, who is Board Certified in Hospice and Palliative Care, Janet Dreyer, NP from Family Choice, as well as your Nurses, Therapists, Aides, Social Worker, Dietician, and anyone else involved with your care.

We will meet with you and your family to discuss how our Solace Program and palliative care can benefit you.

If you think our Solace Program will benefit you or your loved one now, please speak to your Social Worker or RN Unit Coordinator to request a conference.

on one side of the mountain
is the new dawn on the other.”***

***Solace Program
For Palliative Care***

The Briody Health Care Facility Solace program is a philosophy of care that provides:

Personalized Palliative Care for those experiencing chronic illnesses or nearing the end of their lives, and

Education, support, and comfort for family members.
